

Catalogue of Green Practices

Kranj, 15. 9. 2026

Introduction

This Catalogue of Green Practices has been developed as a practical guide to support individuals—particularly students and young people—in adopting more environmentally responsible lifestyles in Kranj, where the Faculty of Organizational Sciences, University of Maribor (FOV UM) is located. It brings together a selection of simple, actionable, and evidence-informed practices that can be implemented in everyday life, spanning mobility and consumption, digital habits, and community engagement.

Kranj is one of the 100 cities in the EU mission aiming to become climate-neutral by 2030. It's a green, forward-thinking city working on cleaner transport, lower emissions, and smarter resource use. From bike-friendly streets to sustainability projects, Kranj is all about making eco-friendly living easy—and showing students how small actions can make a real difference. Use the [Smart Kranj app](#)  to get familiar with traffic options, weather, air pollution, waste management, events and many other useful information.

Awareness / Motivations

Level Up Your Green Skills

Sustainability isn't a trend—it's a mindset.

Stay in the loop:

-  follow eco content
-  join the [ecoSchools programme](#)  at the FOV UM
-  join events/workshops
-  try volunteering

If you are in Kranj in the springtime, you can join the locals at the all-over city cleaning action “[Kran' ni več usran](#) ”, where people join forces to clean the city and have some fun at the main square afterwards.

You should also consider taking elective courses on sustainability at the FOV UM. In the bachelor study you can choose Sustainable business, Engineering and environmental protection, Fundamentals of environmental protection and Sustainable production systems. Master studies offer courses Sustainability management in business, Environmental management and Digital technologies for sustainable development.

Travel

Move Green

*Walking & biking = less pollution
+ better mood + free workout.*

Kranj is a relatively small city. You can walk around the city. If you are running late, try [KR s KOLESOM](#)  bike renting system. Although you will first need to get registered to use the bikes. Grab a 3-day pass for just €3 at the Center for Sustainable Mobility (Cesta talcev 72), which covers both regular and e-bikes.

If you do not feel like exercising, you can use local buses. [Kranvaj](#) , a free electric minibus that can accommodate up to 6 people and a wheelchair, also intended for tourists, runs free of charge through the old town. It stops in the Huje parking lot, in front of the City Library or in Pungart. You can also book transport by calling +386 31 383 700. Public bus timetable is available on the [Arriva company site](#).  Make sure you have a card ready, as cash payments are not accepted!

If you are travelling outside the city, the most convenient way is the bus. You can either take the [Arriva bus](#)  or [Flixbus](#) . The train station is located a short walk outside the city centre, also available by local buses. The timetables of the trains are available on the site of [Slovenske železnice](#). 

And you have two more environmentally friendly options: an electric car sharing system by [Avant2Go](#)  or [GreenGo](#)  provider or shared rides, which you can search for at [Prevozi website](#) .

Living and accommodation

Eco Indoors

Wherever you stay, your room can be low-key eco-friendly without much effort:

- 🌿 turn off lights 💡
- 🌿 unplug stuff
- 🌿 save water 🚰
- 🌿 air-dry clothes
- 🌿 use eco products

It's the little things that add up.

RECYCLING

Recycling means turning used or waste materials into new products. By separating and recycling waste, you help reduce the amount of rubbish that ends up in landfills or in the environment, while also lowering air pollution. Want to make a difference? It's pretty simple:

- 🌿 check the labels on packaging
- 🌿 sort your waste properly
- 🌿 throw it in the right bin

At the FOV UM you will find waste bins labeled to separate waste. Not sure what goes where? No stress—just check our local provider info dictionary at [Komunala Kranj](#)  (use translator tools) and you'll get the hang of it fast. Maybe you will also find some useful information in the following infographics.

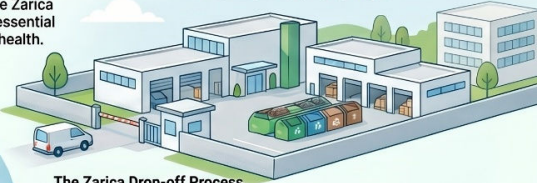

Master Your Waste: A Student's Guide to Recycling in Kranj

Sorting at the Source: Everyday Bins & Islands

Managing waste in Kranj involves a two-tier system: sorting everyday items into color-coded bins at home or "Eco-Islands," and transporting specialized waste to the Zarica Collection Center. Proper sorting is essential for recycling efficiency and public health.

Mobility & Specialized Disposal: The Zarica Center

The Zarica Drop-off Process

- 1 Weigh in
 - 2 Show ID
 - 3 Unload with staff confirmation weight receipt
 - 4 Receive
- Sort waste

Free Annual Allowances:
Residents can drop off up to 1,920kg of waste per year for free.

Reuse Before You Refuse:
Consider taking functional items to the Reuse Center instead of the waste center.

Specialized Waste Disposal

Bulky Waste	Hazardous Waste	E-Waste
Free Pickup (2 m³) (Furniture, mattresses, doors, and sanitary equipment)	Mobile Collection (Paint, oils, pesticides, batteries, and chemicals)	Zarica Center (Computers, phones, appliances, and electric toys)

NotebookLM

Buying and consumption

Fashionable

Fast fashion = fast problems (pollution, waste, overconsumption).

Level up your style:

- 🌱 buy less, choose better
- 🌱 thrift = treasure hunt
- 🌱 swap clothes with friends
- 🌱 wear it more than once (yes, outfit repeating is fine)

Be stylish and sustainable. You can look for secondhand and vintage products in [Humana shop](#) or at [Kr'stacuna](#).

Eat Smarter

Food choices = climate impact

Even 1-2 meat-free days a week makes a difference. Try this:

- 🌱 eat less meat (especially beef)
- 🌱 go plant-based sometimes
- 🌱 buy local + seasonal
- 🌱 don't waste food

You can buy food from local farmers and producers twice a week in the city centre. Wednesday and Friday mornings, you will find individual stalls in the [main square](#) [↗](#). On Saturday mornings the [local market](#) [↗](#) is opened.

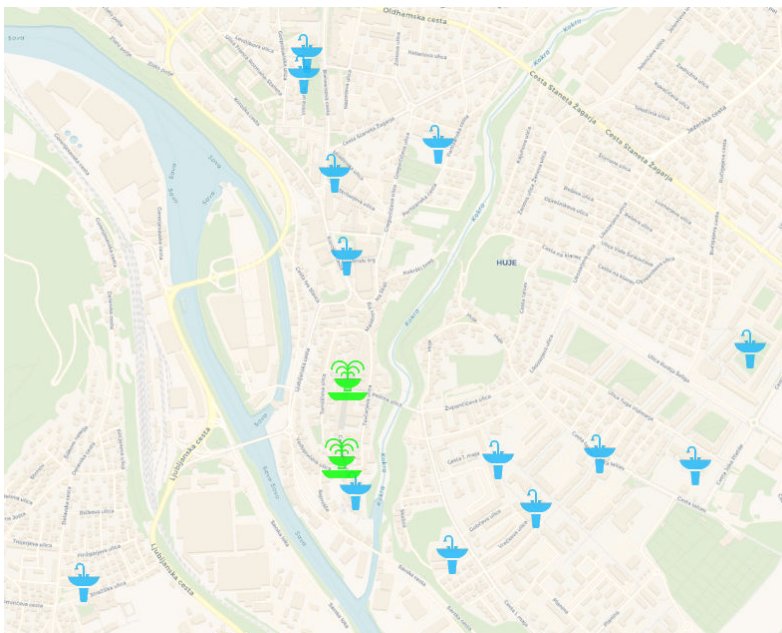

REDUCE PLASTIC

Plastic is literally everywhere. Recycling helps, but using less is the real move. First, note that tap water is safe to drink in Kranj. You can refill your reusable bottle at various locations across the city, as shown on the [interactive map](#). [↗](#)

So, start easy:

- [↗](#) carry a reusable bottle
- [↗](#) say no to single-use cups
- [↗](#) bring your own takeaway container

Future you (and the planet) will thank you. The locations of water fountains in the city centre are shown in the following figure. You can fill your reusable bottles in the blue locations.

Digital habits

Don't Print Unless You HAVE To

Ask yourself: Do I really need this on paper?

Instead:

- 🍃 read on your device
- 🍃 borrow books 📖
- 🍃 buy second-hand

Save trees + save money. There are two antique bookshops in the city centre: [Fragmenti](#) 📖 and Antikvariat Cunjak. If you would like to borrow some books, there is a very nice [public library in the city centre](#) 📖, and of course, the [library at the FOV](#) 📖 UM, where you will find a lot of useful books for your studies.

Clean Your Digital Mess

Your phone, emails, and cloud = hidden energy use ⚡

Declutter like a pro:

- 🍃 delete old files
- 🍃 uninstall unused apps
- 🍃 use links instead of attachments
- 🍃 clean storage regularly

💡 More tips on the [Digital Cleanup Day](#) 📖 site.

Engagement in the community

Community = Power

Doing it solo is cool.

Doing it together is better.

Join:

🌱 repair cafés 🔧

🌱 clothing swaps

🌱 community gardens 🌿

You meet people and help the planet. Win-win. You will get a lot of interesting info about the community events from the local youth in the [Layer house](#)  cultural hub or alternative youth centre [TrainStation SubArt](#) .
